

The Forensic Instrument

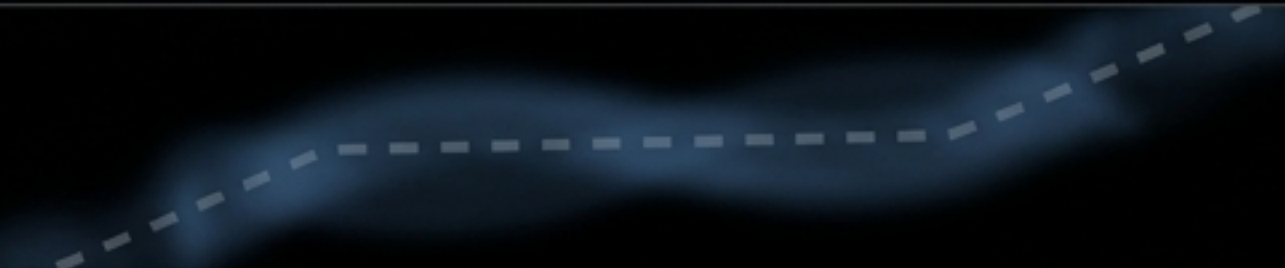

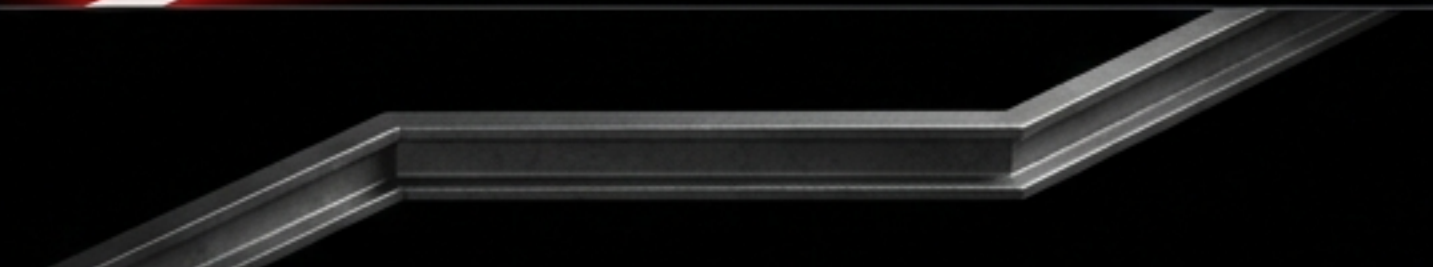

A cinematic state-change storyboard
for the dynamic PROOF Readout.

Ambiguity Doesn't Automate.

We do not invent numbers or present
formulas as scientific validation.

The Evidence Architecture

Evidence Label	Visual Treatment	Definition
Survey Derived		Produced from 15 answers
Assumed		Likely location, unobserved
Illustrative		Model / scenario
Proposed		A next move
Observed		Documented real work

Unknown information stays unknown. A model result cannot be presented as a measured business fact.

The Human Repair Load

Process Drops

- Missing context
- Loose masters
- Unrecorded decisions
- Unfinished handoffs

Human Response

- Searching & chasing
- Checking & remembering
- Reconnecting & translating
- Rebuilding

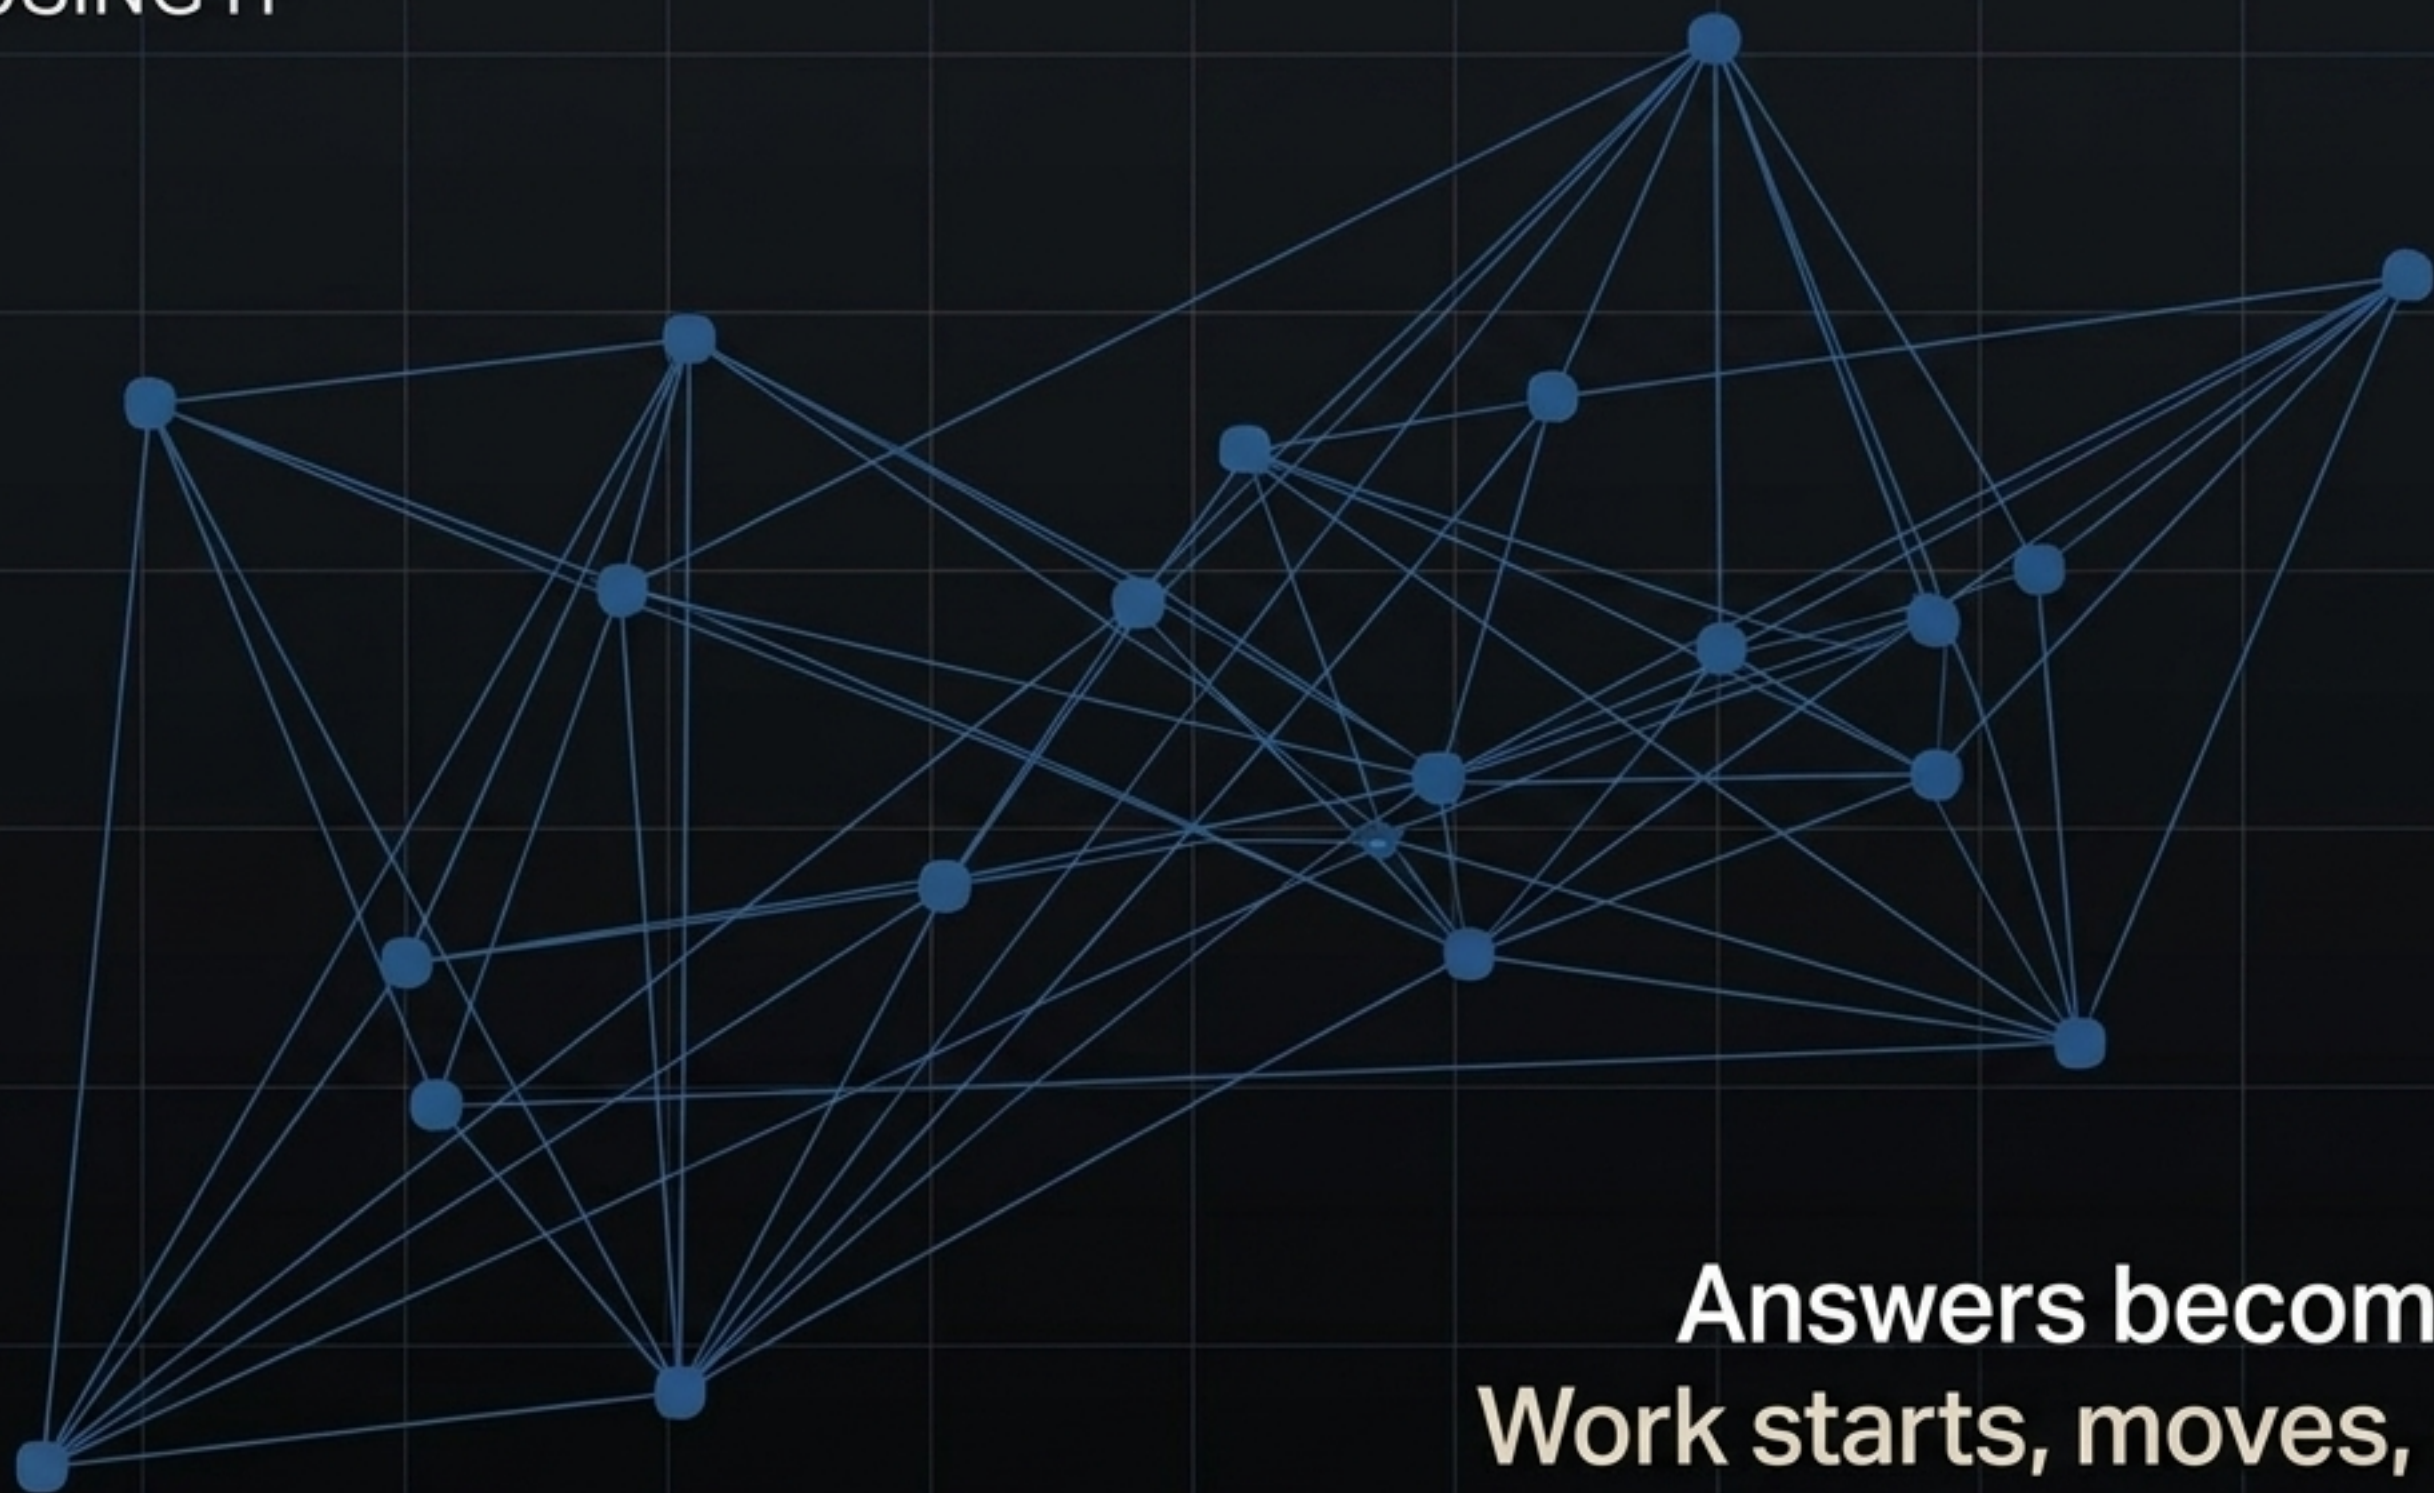

**When repeated repair work becomes the norm, Digital Fog forms.
When people can no longer carry it, Friction appears.**

WHAT YOU'RE FEELING

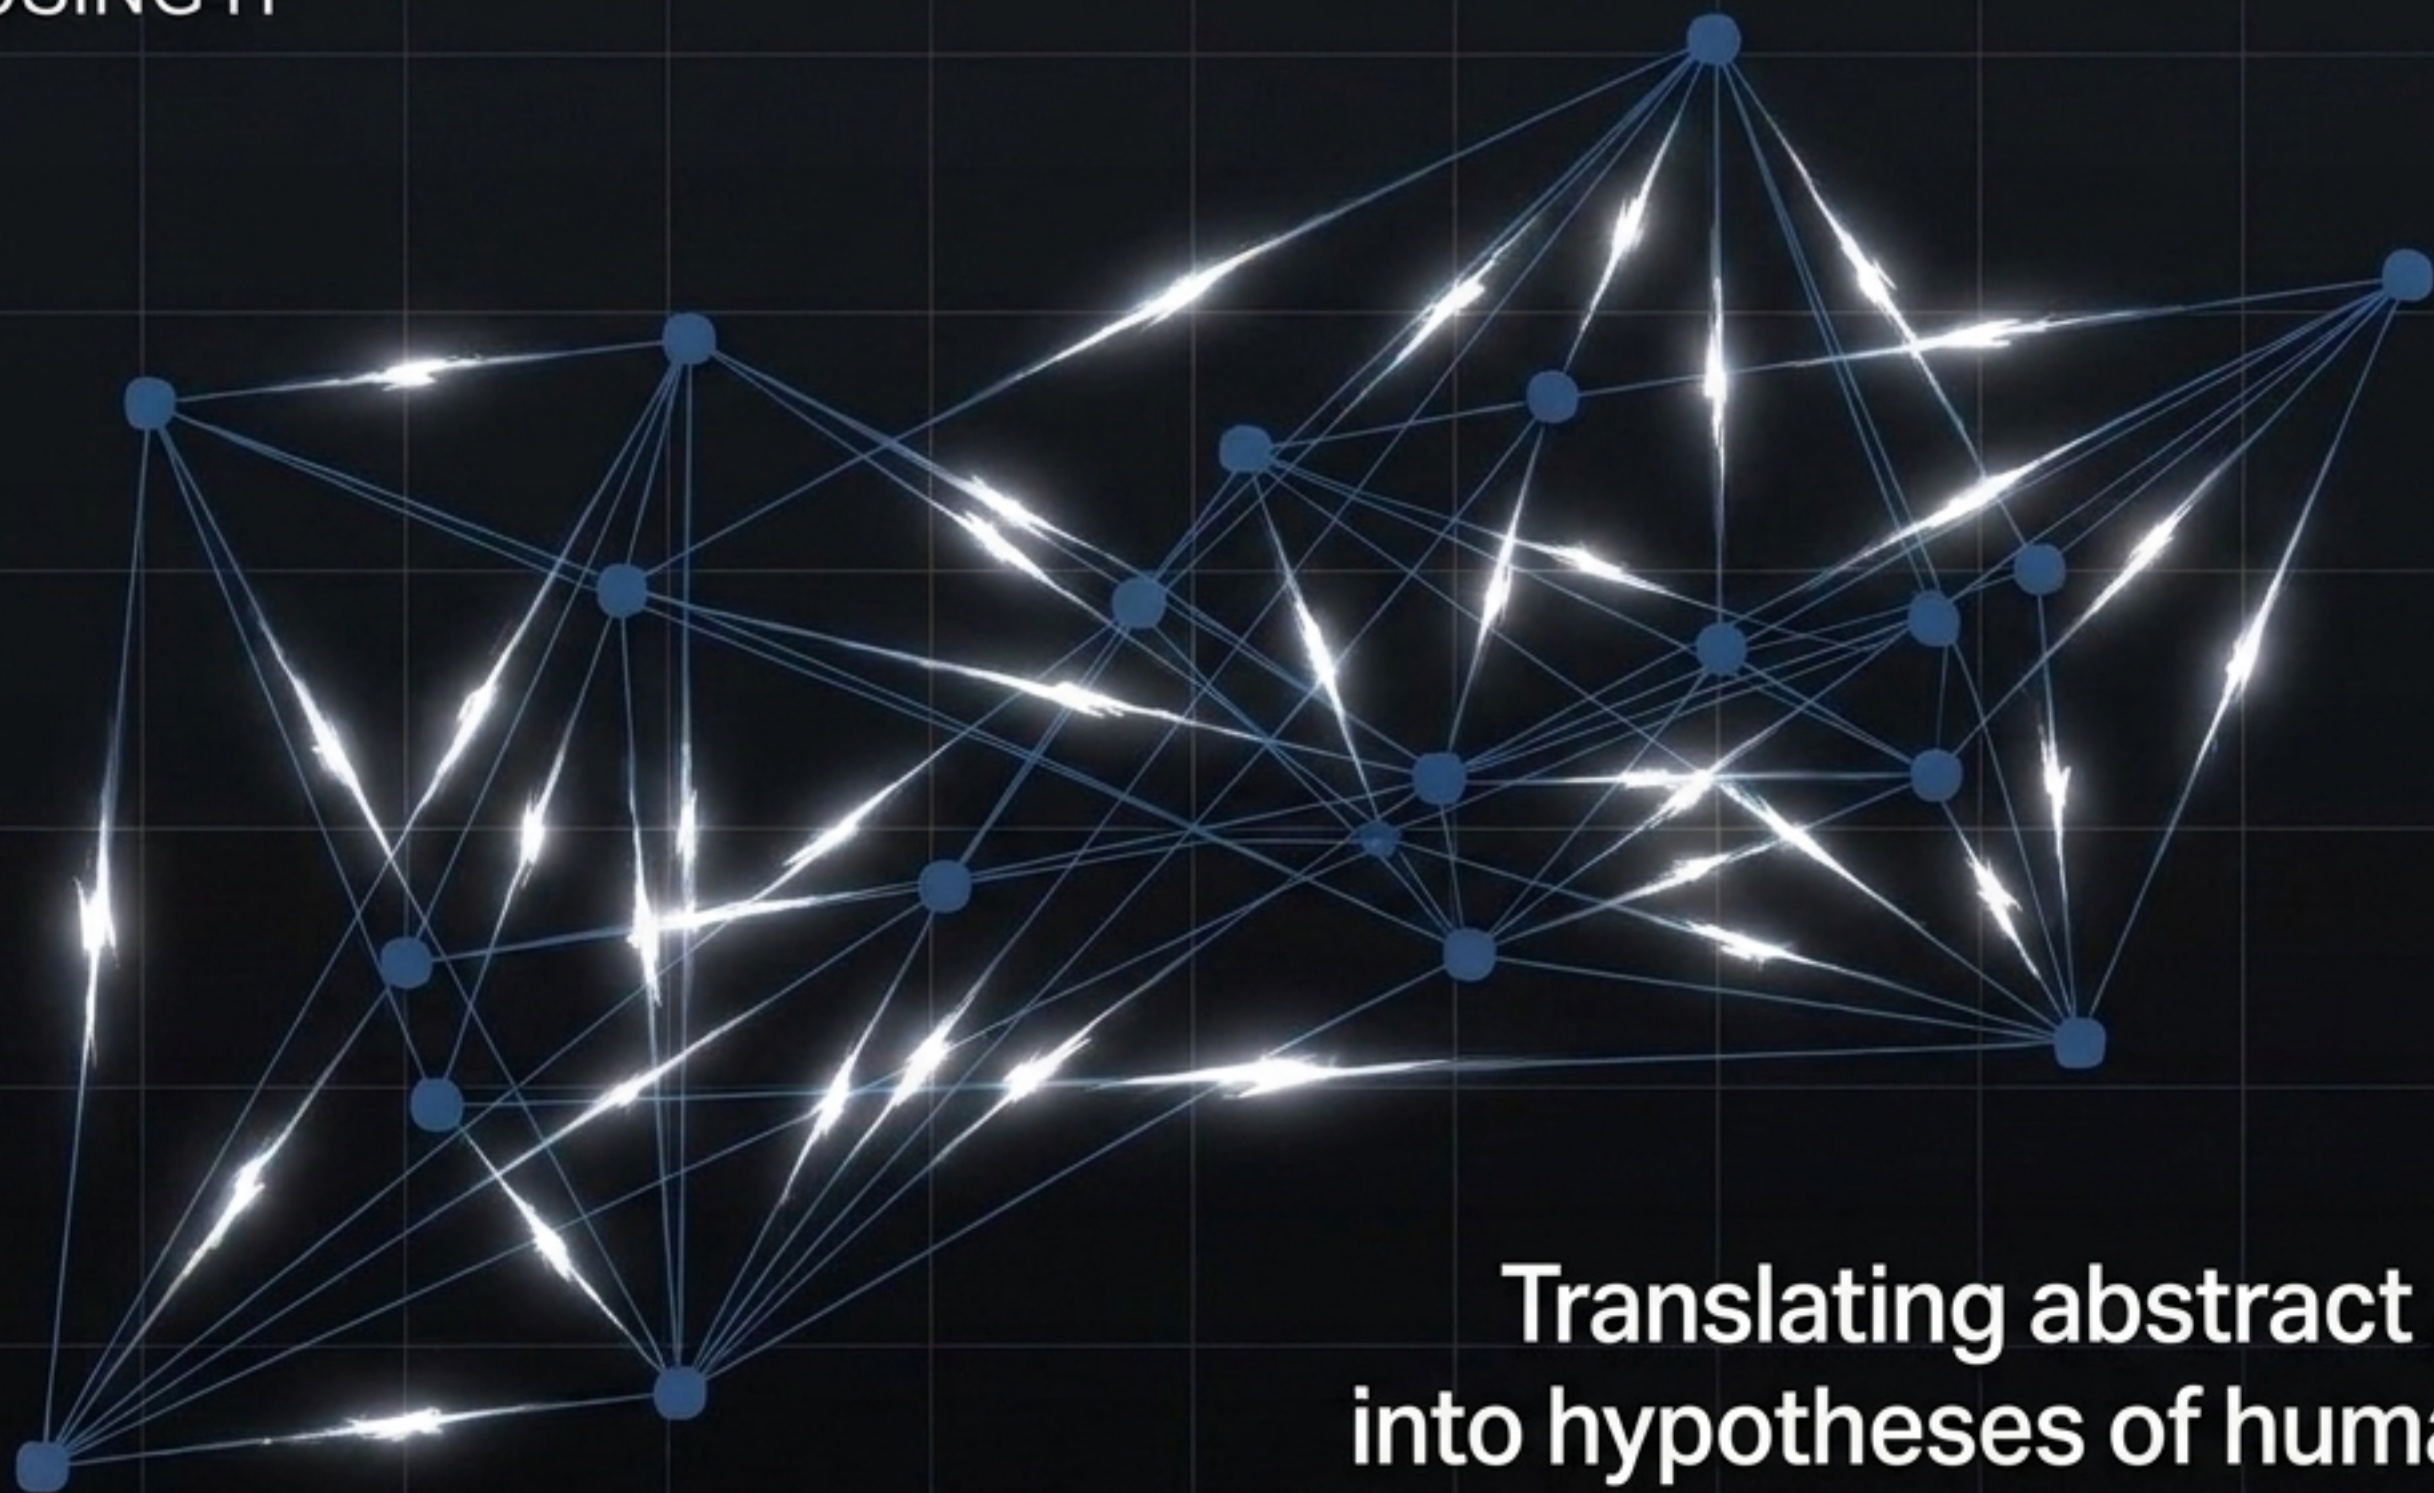

The business field before
the answers resolve.
Capable people are
hiding the problem.

WHAT'S CAUSING IT

**Answers become traces.
Work starts, moves, changes
hands, and retains context
across these coordinates.**

WHAT'S CAUSING IT

**Translating abstract pressure
into hypotheses of human repair.
The intelligence feels present, but
proprietary weights remain hidden.**

**The whole-business condition.
Status, context, and decisions
held together in people's heads.**

WHERE IT'S SHOWING UP

Digital Fog gathering. Visual noise marks the intersections where human response—searching, chasing, checking—is carrying missing context.

An abstract graphic featuring a dark blue background with a light blue grid. A series of concentric, wavy lines in shades of orange, yellow, and green form a central, irregular shape. Thin blue lines radiate from the corners of the frame towards the center, creating a sense of depth and focus.

**Fog hardening into Friction.
The burden grows until work
begins to stall.**

WHAT IT'S TAKING AWAY

Creative

The system dropped the intent;
the people carry the cost.

The Human Carry

Scattered
feedback, missing
missing intent, and
lost revision logic.

The Cost

Taking away
creative energy
and confidence
in the direction.

WHAT MATTERS FIRST

The noise fades. One recurring task is illuminated as the first investigation.

WHAT HAPPENS NEXT

Trace one recurring task from request to done.

Replace assumptions with observed
workflow evidence. Find the moments
someone has to rebuild what is missing.
